Creating Stable Links from LibrarySearch

From the LibrarySearch results list, select the “Full Text Online” link as show below. Right-click and select “Copy Link Location” (in Firefox) or “Copy Shortcut” (in internet explorer). Paste the URL into your website, D2L course*, or other document. Please note that some of our eBooks support only single simultaneous user access online.

*Stable linking to licensed resources from D2L is known to cause errors. See: Linking to VIU library EZproxy resources from D2L for one solution.
