Creating Stable Links to Articles in EBSCOhost Databases

Stable URLs are referred to as “Permalinks” in EBSCOhost databases. They are found in the Tools menu of the detailed article citation view. Click on the article title link in your search results to get to the citation:

Click on “Permalink” in the Tools menu on the right side of the citation.
The Permalink will appear above the citation:

Click on the Permalink to select the entire URL. Then, right-click on the Permalink URL and select “Copy” from the shortcut menu.

Paste the copied URL to create a stable link to the article in your web site or course. It will look something like this:
