Creating Stable Links to Articles in JSTOR

Stable URLs for full text articles in JSTOR are available on the individual item pages.

In the list of JSTOR search results, click on the title of the article to which you would like to link:

![Example of clicking on a title](image1)

The stable URL will be listed along with other item information:

![Stable URL example](image2)
Drag your cursor to highlight the URL, then right-click on it. Select “Copy” from the shortcut menu and paste the URL into your website, course, or other document(s).

Please note that the stable URLs provided by JSTOR do not include the VIU Library proxy server prefix, which is essential to providing off-campus access to stable links.

To make the stable URL accessible from off-campus, prepend our EZProxy prefix to the stable URL. The EZProxy prefix is:

http://ezproxy.viu.ca/login?url=

In the above example, the final, on- or off-campus accessible, stable URL to the article in JSTOR would be:
