Creating Stable Links to Articles in ProQuest Databases

Stable links are referred to as “Document URLs” in ProQuest databases. They are found within the individual item details for your article.

From the search results screen, click on your article’s title:

![Screen capture of ProQuest search results]

Next, click on the “Abstract/Details” tab:
Scroll down past the Abstract, through the item Details until you see the Document URL:

Drag your cursor to highlight the URL, then right-click on it. Select “Copy” from the shortcut menu and paste the URL into your website, course, or other document(s).
