Creating Stable Links to Articles in *ScienceDirect*

*ScienceDirect* provides stable links for its full text articles. In your search results, click on the title of the article to get to the full article record in *ScienceDirect*:

At the bottom of the Brief Report section outlining article details such as title and author(s), you will find the URL for the stable link:

Right click on the URL and select “Copy link address” (“Copy shortcut” in Internet Explorer or “Copy link location” in Firefox). Paste this into your website, course, or other document(s).

**Please note** that the stable URLs provided by *ScienceDirect* do not include the VIU Library proxy server prefix, which is essential to providing off-campus access to stable links.

To make the stable URL accessible from off-campus, prepend our EZProxy prefix to the stable URL. The EZProxy prefix is:

```
http://ezproxy.viu.ca/login?url=
```

In the above example, the final, on- or off-campus accessible, stable URL to the article in *ScienceDirect* would be:

```
```
