INTR 101: Library Class Preparation Activity

We will meet at the Library (building 305, room 508) on Wednesday, October 25.

In preparation for the Library class, you will need to complete the following. Review the Essay 2 assignment before completing this. Bring this sheet to the library class.

1. Will you work with the novel or the film? What is the depicted technology that you are interested in? This can be tentative, but choose something so you have something to work with in class.

______________________________________________________________________________

______________________________________________________________________________

______________________________________________________________________________

2. List a few key terms that capture your chosen technology. Try to get a range of generality. For example, if I am interested in ‘GMO,’ I could list biotechnology, biogenetics, “GM food,” and genetic modification.

Key terms for the technology:

1. ____________________ 2. ____________________ 3. ____________________

4. ____________________ 5. ____________________ 6. ____________________

3. List terms that you could combine with the terms above (or perhaps look for as a separate search). These terms could relate to your work or to an approach to your technology. For example, If I am working on ChickieNobs, I could search for “Oryx and Crake,” Atwood, “Atwood and technology,” “Atwood and Food,” and so on. I could also look for “GMO and fast food” or “GMO and factory farming.”

1. ____________________ 2. ____________________ 3. ____________________

4. ____________________ 5. ____________________ 6. ____________________
